GLADIOLUS
PETUNIAS
AMARYLLIS, DELPHINIUMS
DAHLIAS
*and Other Horticultural and
Vegetable Specialties*

Richard Diener Company Inc.

KENTFIELD - MARIN COUNTY - CALIFORNIA

To Our Friends and Customers

This supplement to our 1926 Catalog is necessary because of the unexpected demand for the first edition of the book. Lack of time for printing, as well as great expense in color reproduction, are our reasons for offering this abbreviated list, which at best, can give but a meagre idea of the beauty of our productions.

GLADIOLUS

In this catalog you will find your old favorites, as well as our 1925 novelties, at prices materially reduced below their introductory cost. We have several new seedlings which give promise of being as popular as the rest of the Diener creations; but these will not be listed until their values have been further tested.

There is no uncertainty or guess about the quality and beauty of Diener Gladiolus. The Symposium of the American Gladiolus Society have consistently honored Diener Gladiolus originations. According to the best available information Diener leads the world in number of high score and named varieties of Gladiolus he has originated.

No bulbs we have ever grown are more worthy of the high honors which Diener Gladiolus have won, than are those of our 1925 crop, listed in this catalog.

Up in Sonoma County, in the beautiful Valley of the Moon, loved and famed by Jack London, our bulbs have been grown on clean, new land. Culture was under the watchful, paternal eye of Richard Diener himself, and our bulbs are strong, healthy and true-to-name.

Before a new Diener variety is offered to the public, it has been proven with scientific exactness. More than twenty-five thousand seedlings—an almost incredible number—are used in the production of each new variety.

Each Diener variety has been tested from four to five years and no variety has less than five flowers open at once. The colorings are most magnificent and the blooms are of very large size.

We carry no other than the Diener varieties of Gladiolus which are listed herein. Owing to limited space, we are unable to describe them in detail. However, we aim to give a brief color description, and are using Ridgway's "COLOR STANDARDS AND NOMENCLATURE" as a guide.

In all parts of the world our productions have been exhibited and have been awarded highest honors. Visitors to our gardens have marvelled at the high perfection to which our varieties have been brought, and rightly so, as the perfecting and raising of new and meritorious novelties has been Mr. Diener's foremost occupation.

California grown bulbs will grow in all sections of the country as well as they do on our soil. Many of our customers write us that they have been advised against buying bulbs from California, it being claimed such bulbs will not produce elsewhere satisfactory growth and blooms. We positively deny this, and have many proofs from all parts of the United States, Canada and foreign lands, that our California bulbs, in those localities, do produce both blooms and bulbs of quality, size and quantity that will compare favorably with similar stock grown in our own state.

OUR NURSERY

Our principal nursery is located at Kentfield, Marin County, on the Redwood Highway, about fourteen miles from San Francisco. It may be reached by the Northwestern Pacific Railway or by automobile via the Golden Gate Ferry and the State Highway.

During the past year we have thoroughly developed our new property in Sonoma, about thirty-three miles north of Kentfield. This has been devoted largely to the production of our Gladiolus, Zinnias and Dahlias.

During our flowering season, extending from June to September, we have visitors from all parts of the world. We cordially invite all lovers of flowers to visit either of our gardens.

Cordially yours,

RICHARD DIENER COMPANY, INCORPORATED.

Terms of Sale

Prices in this catalog cancel all previous quotations.

While we exercise the utmost care to have our stock true to name, we give no warranty, expressed or implied, as to crop, and will not be responsible for results, other than to replace stock not true to name. However, we will not replace bulblets not true to name, except in instances where the single bulb is \$1.00 or over.

Bulbs found to be untrue to name should be returned, and we will replace the number so returned free of charge.

Payment must accompany the order or be received by us before stock is shipped. We will accept unused United States Postage Stamps up to the value of \$1.00, but will not ship unauthorized C.O.D. orders.

We prepay packing and shipping charges on all seed orders; and on all gladiolus bulb orders for more than one dollar. Add fifty cents for postage and packing to bulb orders for a lesser amount.

Plants will be sent by Express, charges collect. If any of our customers prefer to have shipments made by Parcel Post, special instructions should be given to this effect. Additional charges will be made for this service as follows: For packages delivered to points west of the Mississippi River, add 15% to the amount of the order; for packages delivered east of the Mississippi River, add 25%.

Order Early

The stock of many of our recent varieties of Gladiolus, as well as some of our new creations in other lines, is reduced or exhausted very early in the season. We therefore suggest that our friends place their orders as early as possible.

We strive to fill all orders on the day they are received. This cannot always be accomplished during the busy spring months. In case of unusual delay we will acknowledge the order and advise the customer of the date it will be forwarded. We will always acknowledge orders calling for delayed delivery.

Our goods are carefully packed and there is little danger of freezing in transit. If, however, they are received in freezing weather the packages should be left in a cool, frost-protected place for about two weeks before opening. This will insure a slow thawing, should their contents be frozen, and will reduce the danger of injury.

Canadian Customers Please Note

In accordance with the ruling governing the importation of Nursery Stock from the United States into Canada, it will be necessary to obtain a permit from the Secretary of the Destructive Insect and Pest Act Advisory Board, Department of Agriculture, Ottawa, and file same with the Collector of Customs before shipment can be cleared. Seeds are exempt from this ruling, and may be shipped into Canada without a permit. Gladiolus bulbs come under the classification of Nursery Stock.

This ruling must be complied with in order to make delivery, and we ask you, in the event of an order, to secure this permit, advising us of the number, that we may mark it on the outside wrapper.

Join the American Gladiolus Society

If you are a lover of Gladiolus and are looking for detailed information concerning this wonderful flower, become a member of the AMERICAN GLADIOLUS SOCIETY. Send your application with \$2.00 to the Secretary, Mr. John C. Davis, 77 South Avenue, Rochester, New York.

Gladiolus Culture

Soil

Gladiolus will grow in almost any kind of soil, but a heavy clay loam containing some sand, seems to be best for them. The ground should be well spaded in the spring, and if it is not rich enough, some bone meal, or old, well-rotted manure should be spaded under.

Planting

The depth that bulbs should be planted will vary with local weather conditions. Where there is a heavy rainfall and strong winds, they may be planted as deep as three inches; this will tend to keep the flower spikes from bending and breaking. Under average conditions we find the best results are obtained when they are planted about an inch deep. Bulblets should not be covered with more than half an inch of soil. They will grow faster if the outer hard shell is removed just before planting.

As Gladiolus have their enemies in insects and fungi, it is well to dip the bulbs before putting them into the ground. For this purpose use one part of 40% Formaldehyde Solution to one hundred parts of water. The bulbs should be left in the solution for from three to five minutes immediately before planting.

If the leaves are too pale when they develop, sprinkle the ground about with a little Scotch Soot or fresh Portland Cement.

Planting may be done from April to the first of July (in Southern districts from January to July). If this is done at intervals of ten days to two weeks, blooms may be enjoyed until late fall. Gladiolus bulbs should be planted in the full sun, as shade prevents them from attaining full perfection of size and color.

We do not recommend heavy fertilizing. This treatment will increase the size of the flower, but tends to lessen the vitality of the bulb. Top fertilizing with equal parts of dry blood and bone meal, to be worked in with a hoe, will give the best results.

Cultivating

At all times from planting until the bulbs are taken up, the ground should be well cultivated, kept loose and free from weeds and other foreign growth. When spikes are heavy with buds and blossoms they may be bent or broken by wind or rain. The following offers a simple method of minimizing this danger. Set stock out in rows, and on each side of the row drive stakes from four to six feet apart, and securely fastened to these, run two lines of wire properly spaced to support the spikes.

Watering

Newly planted bulbs should not be watered until the foliage has reached a height of six or eight inches. From this time until a month after the flowering season the ground around them should be kept thoroughly moist. Care must be taken to avoid having moisture on the buds and blossoms while they are exposed to warm sunshine. It is therefore well to apply water to the lower part of the plants and to do the watering only during the early morning or evening hours.

Cutting, Digging and Curing

When cutting flowers be very careful that at least four leaves are left on the bulb. This will preserve its life; if it is stripped of its leaves it cannot survive. It is best to let seed pods form on the spike if a strong bulb is desired for reproduction.

Bulbs should be dug when the seed pods are all formed and the spikes begin to wither. They should be lifted with the leaves attached and stacked in the open with the bulbs together and the leaves facing the same way. The bulbs should be covered with burlap to prevent injury from the direct rays of the sun. The leaves will draw much moisture from the bulbs and assist them to ripen. If the weather prevents this treatment, they may be cured in any thoroughly dry place. After ten days or two weeks the leaves should be cut away and the bulbs left in a protected place for another period of ten days or two weeks. At this time the new bulbs should separate easily from the old ones. If they do not, more drying is necessary.

When the proper time arrives the bulblets should be taken off and stored for the next planting. The outer husks should be taken off the bulbs, leaving them with a clean silky appearance. They should be stored in a dark frost-proof place in boxes not deeper than six inches and so constructed as to insure a free circulation of air.

Named Gladiolus Originated by Richard Diener

The following is an alphabetical list of the Gladiolus created and named by the Richard Diener Company. A brief description and the price of each will be found under the number following the name in the complete list which begins on page 6. We consider those marked with a star to be our most valuable commercial varieties.

Gladiolus Price List

Prices include packing and shipping charges on all orders for \$1.00 or more. On smaller orders add 50c for postage and packing.

Bulbs and bulblets will be sold only in the amounts given under each particular variety.

As bulbs of various varieties of Gladiolus are not uniform in size we cannot properly list them by measure. We therefore divide them into three grades according to the size normal to each variety. The fourth size is the "bulblet." By this we mean the corm or bulblet that develops on the growing bulb. These, in general, are about the size of an ordinary garden pea and are covered with moderately hard shells.

Please Read Very Carefully Before Ordering

We shall be glad to make up special assortments of bulbs for our customers who may ask our aid in deciding what to plant. Send us the amount of money you desire to invest in bulbs, state your preference of colors, the number of bulbs desired, and we will make up the best assortment possible.

Orders should be sent in early to insure getting the varieties desired, as our stocks are not all of the same size and some varieties may be exhausted early in the season. Please use order sheet enclosed in the catalog for this purpose.

Substitution

If any variety is out of stock, we will substitute a similar variety unless otherwise instructed.

No. 5. "ALOHA"

	<i>Bulbs</i>	<i>½ size</i>	<i>¼ size</i>	<i>Bulblets</i>
Ground color is a deep rose pink with the tips of the petals shading into carmine. Ruby lip speckled with silver. Flowers are very large and well open.	Each .50	.25
	Dozen 5.00	2.50	1.25
	Hundred 40.00	20.00	10.00

No. 9. "SAUSALITO"

	<i>Bulbs</i>	<i>½ size</i>	<i>¼ size</i>	<i>Bulblets</i>
Rose pink overlaid with bright geranium pink. Magenta throat speckled with white. Flowers very large and heavily ruffled.	Each .25
	Dozen 2.00	1.00	.50
	Hundred 16.00	8.00	4.00	2.00
	Thousand	16.00

No. 13. "SUNSET"

	<i>Bulbs</i>	<i>½ size</i>	<i>¼ size</i>	<i>Bulblets</i>
Pale rosy pink overlaid with cerise. Delicate canary throat. Large blooms and very long spikes.	Each .25
	Dozen 2.00	1.00	.50
	Hundred 16.00	8.00	4.00	2.00
	Thousand	16.00

No. 22. "SAN ANSELMO"

	<i>Bulbs</i>	<i>½ size</i>	<i>¼ size</i>	<i>Bulblets</i>
Pure white delicately penciled with ruby pink. Flowers very large and free. Fine for cut flowers.	Each .10
	Dozen 1.00	.50	.25
	Hundred 8.00	4.00	2.00	1.25
	Thousand	8.00

No. 24. "D. J. WHITNEY"

	<i>Bulbs</i>	<i>½ size</i>	<i>¼ size</i>	<i>Bulblets</i>
Geranium pink with salmon and rose shading. Lower petals lemon yellow with carmine, opens in a full cluster at the apex of the stem, giving the appearance of a canna. Earliest of all, good for forcing.	Each .75	.40
	Dozen 7.50	3.75	1.90
	Hundred 60.00	30.00	15.00

No. 29. "VENUS" (1925)

	<i>Bulbs</i>	<i>½ size</i>	<i>¼ size</i>	<i>Bulblets</i>
Pure white, lower petals showing faint traces of sulphur yellow and distinct stripes of true purple. Edges heavily ruffled. Very long spikes.	Each 10.00	5.00
	Dozen 100.00	50.00

No. 32. "FAIRFAX"

	Bulbs	½ size	¼ size	Bulblets
Solid magenta. Lower petals deep ruby circled with cream.	Each .15
	Dozen .75	.40	.20
	Hundred 6.00	3.00	1.50	1.25
	Thousand 48.00	24.00	12.00	6.00

*No. 38. "JACK LONDON"

	Bulbs	½ size	¼ size	Bulblets
Light salmon with vermilion stripes. Canary yellow throat with ruby stripes. Our best commercial variety and largest propagator. It is perfect in every way. As a cut flower it is our most profitable variety, as we have never been able to supply the demand. Even the smallest bulblet will bring a four-foot spike, five months after planting.	Each .25
	Dozen 2.00	1.00	.50
	Hundred 15.00	7.50	3.75	2.00
	Thousand 120.00	60.00	30.00	15.00

*No. 67. "MRS. J. K. ARMSBY"

	Bulbs	½ size	¼ size	Bulblets
Coral pink, delicately penciled with vermilion near the edges. Throat cream, speckled with ruby. Flowers very large, a great many opening at one time, and of great lasting quality. This is one of our finest productions and is sure to satisfy any critic.	Each 1.00	.50	.25
	Dozen 10.00	5.00	2.50	1.25
	Hundred 80.00	40.00	20.00	10.00

No. 82. "JOHN MERLE COULTER"

	Bulbs	½ size	¼ size	Bulblets
Rich scarlet red, almost black throat. Petals of velvet texture, flowers large and flaring. Beautiful variety.	Each .25
	Dozen 2.00	1.00	.50
	Hundred 16.00	8.00	4.00

No. 83. "MRS. WILLARD RICHARDSON"

	Bulbs	½ size	¼ size	Bulblets
Deep crimson, maroon center. Petals of very heavy texture. Large flaring blossoms. An unexcelled red that does not fade. Not more than one dozen bulbs to a customer.	Each .25
	Dozen 2.50	1.25	.65

No. 89. "NORMA KRAUSGRILL"

	Bulbs	½ size	¼ size	Bulblets
Light rose pink with deep strawberry stripes. Lemon yellow splashes on lower petals covered with spots of ruby.	Each .75	.40
	Dozen 7.50	3.75	1.90	1.00
	Hundred 60.00	30.00	15.00	7.50

No. 90. "CAROLINE FREAR BURKE"

	Bulbs	½ size	¼ size	Bulblets
Ground color white, overlaid with rose pink. Brilliant ruby lip.	Each .15
	Dozen 1.00	.50	.25
	Hundred 8.00	4.00	2.00	1.25

*No. 96. "RICHARD DIENER"

	Bulbs	½ size	¼ size	Bulblets
Pure geranium pink with a slight sprinkling of ruby on creamy yellow center. Large flaring blossoms, rivaling an orchid in beauty. The acme of perfection in coloring. This variety has created a sensation wherever shown.	Each .50	.25
	Dozen 5.00	2.50	1.25
	Hundred 40.00	20.00	10.00	5.00

No. 107. "HEART OF JUANITA"

	Bulbs	½ size	¼ size	Bulblets
Deep cherry scarlet. Crimson and white throat. A very beautiful variety that does not fade in the sunlight. One of the best dark colored varieties.	Each .25
	Dozen 2.50	1.25	.65
	Hundred 20.00	10.00	5.00	2.50

*No. 113. "MRS. NEWELL VANDERBILT"

	Bulbs	½ size	¼ size	Bulblets
Light salmon pink, heavily ruffled. Throat sulphur yellow, mottled and striped with crimson. Large flowers, clean grower and A-1 variety.	Each	.50	.25
	Dozen	4.00	2.00	1.00
	Hundred	32.00	16.00	8.00
	Thousand	30.00

No. 117. "SIERRA"

	Bulbs	½ size	¼ size	Bulblets
Cream, speckled and striped with rose and lilac. Yellow and ruby lip. Flowers large and very heavily ruffled. Strong spikes. Not more than one bulb to a customer.	Each	1.00

*No. 130. "THOMAS T. KENT"

	Bulbs	½ size	¼ size	Bulblets
Shell pink overlaid with strawberry. Crimson streak on each petal. Very vigorous in growth. This is one of our largest varieties and heaviest propagators. Spikes very tall. It has proven a favorite everywhere.	Each	.25
	Dozen	2.00	1.00	.50
	Hundred	16.00	8.00	4.00
	Thousand	120.00	60.00	30.00

No. 174. "ATLANTIS"

	Bulbs	½ size	¼ size	Bulblets
Geranium pink overlaid with vermillion. White center with huge spots of scarlet and a deep crimson stripe through the lip. Very large flowers and when open are like Amaryllis. Long spikes.	Each	.50	.25
	Dozen	5.00	2.50	1.25
	Hundred	40.00	20.00	10.00

*No. 175. "MRS. LEON DOUGLAS"

	Bulbs	½ size	¼ size	Bulblets
Ground color begonia rose striped with flame and brilliant scarlet. Lip pale lemon slightly speckled with ruby. The size of the flowers, we believe, are the largest in existence, and all are very open and well set on long spikes. Spikes are extra long and have up to as many as seven side spikes on each main one. Bulbs are of very large size. One of our finest varieties.	Each	1.00	.50	.25
	Dozen	10.00	5.00	2.50
	Hundred	80.00	40.00	20.00

No. 187. "COSTA RICA"

	Bulbs	½ size	¼ size	Bulblets
Clear orchid, ruffled edges tinged with deeper color. Crimson center. Large fine spikes. Very valuable variety.	Each	.25
	Dozen	2.00	1.00	.50
	Hundred	16.00	8.00	4.00
	Thousand	120.00	60.00	30.00

*No. 188. "MRS. MARY STEARNS BURKE"

	Bulbs	½ size	¼ size	Bulblets
Canary yellow, overlaid with apricot and tinged with rose. Deep canary center with ruby throat. Long spikes with flowers symmetrically placed; stem wiry and upright. Flowers large. It is one of the finest yellows known so far. Very valuable as a cut flower variety.	Each	.25
	Dozen	2.00	1.00	.50
	Hundred	15.00	7.50	3.75
	Thousand	120.00	60.00	30.00

*No. 189. "ELIZABETH GERBERDING"

	Bulbs	½ size	¼ size	Bulblets
Shell pink heavily ruffled, shading into rose on the outer edges. Center pale canary and ruby. Spikes large and full.	Each	.15
	Dozen	1.00	.50	.25
	Hundred	8.00	4.00	2.00
	Thousand	8.00

*No. 191. "MRS. H. E. BOTHIN"

Light geranium pink, heavily ruffled. Flame scarlet center. Strong, well built spikes; first class show and cut flower variety. One of the loveliest combinations in Gladiolus. It has created a sensation wherever produced. A heavy propagator.		<i>Bulbs</i>	$\frac{1}{2}$ size	$\frac{1}{4}$ size	<i>Bulblets</i>
	Each	.25	-----	-----	-----
	Dozen	2.00	1.00	.50	-----
	Hundred	16.00	8.00	4.00	2.00
	Thousand	-----	-----	-----	10.00

No. 196. "HELEN TODD"

Amaranth pink with light stripes through the center of three upper petals. Ruby lip shading into deeper ruby at the throat. Rosy colored seam around the edge of the entire flower. Not more than one dozen bulbs to a customer.		<i>Bulbs</i>	$\frac{1}{2}$ size	$\frac{1}{4}$ size	<i>Bulblets</i>
	Each	.25	-----	-----	-----
	Dozen	2.50	1.25	-----	-----

No. 211. "ZOE"

Deep magenta, velvet maroon center. Very large flowers exceptionally fine color.		<i>Bulbs</i>	$\frac{1}{2}$ size	$\frac{1}{4}$ size	<i>Bulblets</i>
	Each	1.50	.75	.40	-----
	Dozen	15.00	7.50	3.75	-----
	Hundred	120.00	60.00	30.00	-----

No. 218. "YOSEMITE"

Geranium red shading into rose doree. Light stripe through the center of each petal. Lip pale lemon yellow. Flowers very large and open. Spikes often reach a height of seven feet.		<i>Bulbs</i>	$\frac{1}{2}$ size	$\frac{1}{4}$ size	<i>Bulblets</i>
	Each	.50	.25	-----	-----
	Dozen	5.00	2.50	1.25	-----
	Hundred	40.00	20.00	10.00	5.00

No. 220. "ELDIVA"

Cerise with a lighter stripe running through the center. Penciled with crimson. Long spikes. First class show variety.		<i>Bulbs</i>	$\frac{1}{2}$ size	$\frac{1}{4}$ size	<i>Bulblets</i>
	Each	.50	.25	-----	-----
	Dozen	5.00	2.50	1.25	-----
	Hundred	40.00	20.00	10.00	5.00

No. 221. "LONDON SMOKE"

Corinthian Red shading into Bordeaux on the outer edges of the petals. Fine light stripe running through the center of each petal. Lip speckled with ruby. Large flowers, long spikes. A very odd variety and good strong grower.		<i>Bulbs</i>	$\frac{1}{2}$ size	$\frac{1}{4}$ size	<i>Bulblets</i>
	Each	.25	-----	-----	-----
	Dozen	2.00	1.00	.50	-----
	Hundred	16.00	8.00	4.00	2.00
	Thousand	120.00	60.00	30.00	10.00

*No. 232. "FLAME"

Flame orange. Yellow lip, well built spikes.		<i>Bulbs</i>	$\frac{1}{2}$ size	$\frac{1}{4}$ size	<i>Bulblets</i>
	Each	.50	.25	-----	-----

*No. 293. "POLA NEGRI"

	Bulbs	½ size	¼ size	Bulblets
Each	.50	.25
Dozen	5.00	2.50	1.25
Hundred	40.00	20.00	10.00	5.00
Thousand	320.00	160.00	80.00	40.00

Apricot with yellow lip. Ruffled, shading into old rose and salmon on the outer edges. One of the loveliest color combinations ever seen. Flowers on the spike sometimes come irregular. A very heavy propagator. We especially recommend this variety.

No. 295. "BLASCO IBANEZ"

	Bulbs	½ size	¼ size	Bulblets
Each	5.00	2.50	1.25	.65
Dozen	50.00	25.00	12.50	6.25
Hundred	400.00	200.00	100.00	50.00

Very deep dahlia purple with a lighter stripe through the upper petals. Very large size. An extra fine variety.

No. 304. "SAN JOSE"

	Bulbs	½ size	¼ size	Bulblets
Each	5.00	2.50	1.25

Center lemon yellow shading into apricot on outer edge of petals. Peach red striping. Flowers large. Well built spikes. Stock limited. Only one bulb to a customer.

*No. 305. "J. A. CARBONE"

	Bulbs	½ size	¼ size	Bulblets
Each	3.00	1.50

Orange salmon, very iridescent, darker shading toward the outer edge of the petals. Yellow center. Fine, long, well built spikes. One of our largest and finest productions. No more than six bulbs to a customer.

No. 313. "W. A. SISSON" (1925)

	Bulbs	½ size	¼ size	Bulblets
Each	75.00	37.50	6.00

Rose purple overlaid with liseran purple. Baryta yellow stripes on lower petals. Ruffled edges. Very fine build. Flowers appear in three rows instead of two. Not more than one bulb or bulblet to a customer.

No. 315. "ELIZABETH HARDEE"

	Bulbs	½ size	¼ size	Bulblets
Each	1.00	.50	.25
Dozen	10.00	5.00	2.50	1.25
Hundred	80.00	40.00	20.00	10.00

Watermelon pink, with nopal red stripes and blotches. Ruby lip with cream white stripes appearing in the center, surrounded by cream and red speckles. A beautiful and attractive variety.

No. 317. "LUCIA"

	Bulbs	½ size	¼ size	Bulblets
Each	1.00	.50	.25
Dozen	10.00	5.00	2.50	1.25
Hundred	80.00	40.00	20.00	10.00

Amaranth pink with rose stripings. Flowers of the very largest size.

No. 320. "ESTHER OLSON"

	Bulbs	½ size	¼ size	Bulblets
Each	1.00	.50	.25
Dozen	10.00	5.00	2.50	1.00
Hundred	80.00	40.00	20.00	8.00

Seashell pink, shading to shrimp pink on the outer edge. Faint ruby stripes through the lower petals. Lip straw color. Exquisite color and perfect in every respect.

*No. 327. "DR. ADOLPH ROSENTHAL"

	Bulbs	½ size	¼ size	Bulblets
Each	.25
Dozen	2.50	1.25	.65
Hundred	20.00	10.00	5.00	2.00
Thousand	160.00	80.00	40.00	15.00

Real geranium pink overlaid with scarlet. White stripes through lower petals. Flowers large. Exquisite variety.

No. 328. "BUBBLES"

Flesh color overlaid with shrimp pink. Lower petals of light greenish yellow. One spike forms a large close set bouquet. A beauty. Should be in every collection.

	Bulbs	½ size	¼ size	Bulblets
Each	.50	.25
Dozen	5.00	2.50	1.25
Hundred	40.00	20.00	10.00	3.00
Thousand	25.00

No. 329. "MOONBEAM"

Light chamois color. Canary center. Of fine clean growth.

	Bulbs	½ size	¼ size	Bulblets
Each	1.00	.50	.25
Dozen	10.00	5.00	2.50	1.00
Hundred	80.00	40.00	20.00	8.00

No. 334. "EUDORA"

Rhodamine purple, white splashes in the center. Flowers large. Exceptionally fine growth.

	Bulbs	½ size	¼ size	Bulblets
Each	10.00	5.00	2.50	1.25
Dozen	100.00	50.00	25.00	12.50
Hundred	800.00	400.00	200.00	100.00

*No. 339. "HENRY FORD"

Very dark rhodamine purple shading into deeper tones near the center. Color very clear like Anna Eberius, but much larger and cleaner. It is a tremendous propagator, and even the smallest bulblet will bring a flower spike three or four feet tall five months after planting. This variety far surpasses our famous "Anna Eberius."

	Bulbs	½ size	¼ size	Bulblets
Each	1.00	.50	.25
Dozen	10.00	5.00	2.50	1.00
Hundred	80.00	40.00	20.00	8.00
Thousand	60.00

No. 342. "BETTY COMPSON" (1925)

Phlox pink overlaid with phlox purple. Lower petals, Baryta yellow, sprinkled with purple. Long spikes.

	Bulbs	½ size	¼ size	Bulblets
Each	25.00

No. 345. "MAY McAVOY" (1925)

Pale rose purple, a very clean color. Phlox purple speckles on the lower petals. Flowers measure five inches. Spikes six to seven feet tall, having from four to five side spikes.

	Bulbs	½ size	¼ size	Bulblets
Each	75.00

No. 346. "LA PALOMA" (1925)

Snow white showing faint traces of phlox purple on lower petals. Slightly ruffled.

	Bulbs	½ size	¼ size	Bulblets
Each	10.00	5.00	2.50

No. 349. "MARS" (1925)

Magenta. Reddish purple spots with small yellow stripes through center of lower petals. Flowers evenly arranged, measuring five inches across. Long spikes.

	Bulbs	½ size	¼ size	Bulblets
Each	10.00	5.00

*No. 354. "THAIS VALDEMAR"

Iridescent old rose overlaid with bright vermilion. No markings. Large flowers. Very beautiful. A variety with a great future.

	Bulbs	½ size	¼ size	Bulblets
Each	3.00	1.50
Dozen	30.00	15.00
Hundred	240.00	120.00

No. 355. "LAGUNITAS"

Very pale shade between lilac and rose pink. Lip pale yellow overlaid with ruby. Long sturdy spikes.

	Bulbs	½ size	¼ size	Bulblets
Each	5.00	2.50	1.25
Dozen	50.00	25.00	12.50

No. 358. "NOLENE"

Very deep shade between carmine and ox-blood, with darker velvet lip. Spikes well built.

	<i>Bulbs</i>	<i>½ size</i>	<i>¼ size</i>	<i>Bulblets</i>
Each	2.50	1.25	.65
Dozen	25.00	12.50	6.25	2.50
Hundred	200.00	100.00	50.00	20.00

No. 363. "ALMA RUBENS" (1925)

Pale grenadine pink with tyrian pink stripes on the lip, surrounded by rose red. Clean color, excellent formation. Long spikes.

	<i>Bulbs</i>	<i>½ size</i>	<i>¼ size</i>	<i>Bulblets</i>
Each	25.00

No. 365. "TORADOR"

Deep nopal red with still darker seam around the edges. Very large funnel shaped flowers. Long well built spikes. Beautiful variety.

	<i>Bulbs</i>	<i>½ size</i>	<i>¼ size</i>	<i>Bulblets</i>
Each	3.00	1.50	.75
Dozen	30.00	15.00	7.50	3.00

No. 367. "CATTLAYA"

Amaranth pink with cream yellow center. Long fine spikes. Exceptionally fine variety.

	<i>Bulbs</i>	<i>½ size</i>	<i>¼ size</i>	<i>Bulblets</i>
Each	2.00	1.00
Dozen	20.00	10.00

No. 369. "SAN FRANCISCO" (1925)

Pale lobelia violet with phlox purple markings. Lower petals have Baryta yellow spots. Edges heavily ruffled.

	<i>Bulbs</i>	<i>½ size</i>	<i>¼ size</i>	<i>Bulblets</i>
Each	25.00	12.50

No. 372. "MRS. A. B. C. DOHRMANN" (1925)

Venetian pink overlaid with jasper red. Fine stripe of pale green yellow on the lip. Lip faintly spotted with scarlet red. Flowers six inches across.

	<i>Bulbs</i>	<i>½ size</i>	<i>¼ size</i>	<i>Bulblets</i>
Each	25.00

No. 374. "KATHRYN WILLIAMS" (1925)

Pale rose purple overlaid with rose purple. Lower petal amber yellow, with amaranth purple speckles. Fine variety.

	<i>Bulbs</i>	<i>½ size</i>	<i>¼ size</i>	<i>Bulblets</i>
Each	7.50

No. 375. "MILTON SILLS" (1925)

Ground color alizarine pink, heavily overlaid with rose doree and jasper red.

	<i>Bulbs</i>	<i>½ size</i>	<i>¼ size</i>	<i>Bulblets</i>
Each	10.00	5.00	2.50	1.25

No. 376. "TEHAMA" (1925)

Blue variety. Cotinga purple. Lip darker. Extra early variety. Perfect

	<i>Bulbs</i>	<i>½ size</i>	<i>¼ size</i>	<i>Bulblets</i>
Each	15.00

No. 378. "YOLO" (1925)

Aster purple. Petals alternately marked with dahlia purple and empire yellow. Good formation and early blooming.

	<i>Bulbs</i>	<i>½ size</i>	<i>¼ size</i>	<i>Bulblets</i>
Each	2.50	1.25

No. 380. "NIXE" (1925)

Jasper pink spotted with Spectrum red near the base. Very large. Ruffled edges.

	<i>Bulbs</i>	<i>½ size</i>	<i>¼ size</i>	<i>Bulblets</i>
Each	10.00	5.00	2.50

No. 382. "WOTAN" (1925)

Eosine pink with rose red shadings. Center of each petal striped white. Lower petal has carmine spot surrounded by Pinard yellow. Very open and large flowers.

Each

Bulbs	½ size	¼ size	Bulblets
25.00	12.50	6.25	3.00

Light corinthian red overlaid with deeper corinthian red and perilla purple. White stripes through the center of each petal. Perfect formation and large flowers.	Each	10.00	5.00	2.50	1.25

Gladiolus Seed

Selected from all our named varieties and seedling, well mixed. The sizes of the flowers range from 4 to 9 inches in diameter, and the height of the stems is from 5 to 8 feet. The seedlings of this seed will flower in from 5 to 6 months after sowing, if they receive proper care. It must be understood that the right size of the flowers and stems of seedling Gladiolus comes out in the second year of cultivation. These seedlings will range in all colors, but salmon, white, lilac, pink and rose-pink predominate.

Price of 10 grams (about 1,000 seeds).....75c

Diener's 1926 Special Mixture

50 large bulbs	\$2.00
125 $\frac{1}{2}$ and $\frac{1}{4}$ sizes	2.00
1 pound bulblets	2.00
(about 1000 bulblets)	

Gladiolus Collections

The collections listed below are arranged to appeal to the home gardener. They offer an inexpensive means of acquiring some of Diener's most famous creations. Should our stock of any variety listed become exhausted we will substitute a bulb of equal or greater value.

Please order collections by number.

COLLECTION No. 1

Regular Price \$2.35. Collection Price \$1.50
Includes one bulb each of the following:

Mable Hubbard, No. 98	\$.50
Thomas T. Kent, No. 130	.25
Miss Maud Fay, No. 176	.25
London Smoke, No. 221	.25

PETUNIAS

Our originations in Petunias are even more unique in color and great size than our Gladiolus. There is as much difference between our creations and the old-fashioned or common petunia as there is between the modern Mazda electric lamp and the old carbon globe. We believe that no one else has been able to even approach Diener's Ruffled Monsters in color, form or size.

Raising the Seed

All of our seed is raised in lath houses where insects are excluded and chance pollination is eliminated. Every flower is carefully pollenized by the hand of an expert who has grown deft with years of training in this delicate operation.

This process is made necessary because of the inherent habit of Petunias to revert to the original type. We have spent many years in our endeavor to change this habit, and our success, though flattering, has been at the price of years of patient toil.

Our strains are constantly being improved in growth, color and size of flowers. In shipping we take the utmost pains to see that the seed is kept free from moisture and danger of crushing. We suggest that other growers will find it greatly to their advantage to avoid attempting to raise their own seed. Uniform satisfaction may be enjoyed by procuring your entire supply from seeds grown and cleaned by the Richard Diener Company.

Petunia Culture

Our Ruffled Monster Petunias have brought these flowers into high favor among all growers. As they may be grown so as to bloom all year around, they may be made most valuable commercially. Beds will open on stems placed in water, thus replacing the fading flowers and giving a bouquet that will last many days.

Sowing

Prepare a seed bed by taking two parts of any light compost or leaf mold thoroughly mixed with one part of clean sand. Sift all through a fine sieve. With this mixture mix the seed and press down the soil to a flat surface within two inches of the top. Give a thorough soaking. After the water has seeped into the soil, sprinkle the Petunia Seed evenly over this surface, but do not cover with soil. To prevent attacks of fungi, sprinkle the newly sown flats with charcoal dust. Place a clean pane of glass over them and if reached by the sun's rays, place a single sheet of paper over the glass to prevent burning. At night and in dark weather remove the paper. Avoid carefully not to cross or moisture and have pans near glass in well ventilated atmosphere.

The seed should sprout in from eight to ten days if kept in a temperature of sixty degrees. As soon as this occurs the glass may be removed. Ants will carry off the seed and really will eat the young plants, so care must be exercised to protect them from so common a pest. Our method of preparing seed for sale is such that practically no loss is to be feared, and back of success in raising plants is, in general, to be traced to our constant care in sowing or properly preserving the seed after it has been sown. Experience has shown that the best month for sowing our varieties is February.

Transplanting

As soon as the young plants have developed four or five leaves, they should be removed to separate three inch pots and three or four weeks later, when the roots are well developed, they may be lifted to six or seven inch pots, or set out in the garden. In transplanting great care must be taken to avoid planting too deep. Plant only the roots, not the stem. Another plant may be high than too low.

Soil

Petunias are great feeders and require rich ground. A good compost or old hotbed soil with the addition of about one sixth clean sand is recommended. For fertilizer use a moderate amount of bone meal and dig it in thoroughly mixed with the soil.

Location

Petunias need plenty of light. When raised in greenhouses or hotbeds they should be exposed to the rays, but have plenty of ventilation. When planted in the garden, they should be in the best spot is the sunniest and most open.

Petunia Plants

Petunia plants are too delicate to justify shipment greater distances than a thousand miles. To plants at a longer distance they should be received in excellent condition, if shipped out any day April, May or June.

The prices are for plants packed, ready for shipment at Kentfield, by the American Express, with transportation charges to be collected at destination.

Providing plants (single) out of three-inch pots \$2.50 per dozen; \$18.00 per hundred. Price of Double Petunia Plants on request.

PETUNIAS

Ruffled Monsters

	Price Per Pkg.
No. 1. PINK. Strong veined center. Flowers 6 to 8 inches in diameter, and of exquisite color combination. This variety is without doubt one of the largest and most wonderful varieties in existence.....	\$.50
No. 2. RED. Strongly veined Mahogany and black center. Average flowers 5 to 7 inches in diameter.....	.50
No. 3. VARIEGATED. Colors appearing in checks, blotches and stripes of red, pink and white. Flowers 5 to 7 inches in diameter.....	.50
No. 4. WHITE50
No. 5. RED WITH BLACK CENTER. Outer edge of the flower is red with a coal black center50
No. 6. PALE LILAC PINK. Heavily ruffled with strongly veined center. Flowers 4 to 5 inches in diameter50
No. 7. RED AND WHITE VARIEGATED. Large yellow center.....	.50
No. 18. VARIEGATED HEAVY RUFFLED. Outside white with blotches and checks of magenta appearing on edges of petals. Size of flowers 4 to 5 inches across50
No. 20. MAUVE. Center heavily veined with Royal purple. One of our most exquisite and most popular varieties. Average flowers 5 inches across.....	.50
No. 8. RUFFLED MONSTERS MIXED. All colors of the above mentioned varieties evenly mixed50

The Following Varieties Are Somewhat Smaller Than the Ruffled Monsters:

No. 9. FLESH PINK FRILLED. A most beautiful variety, with edges frilled. Flowers are 3 to 4 inches in diameter.....	\$.50
No. 10. WHITE FRILLED. Snow white with flowers 3 inches in diameter. Plants of dwarf growth50
No. 11. BLUE OR PURPLE. We especially recommend this variety. It has been greatly improved in size and clearness of color. The flowers average 4 inches in diameter. It is of a rich silky blue.....	.50
No. 12. APPLE BLOSSOM. Pale Apple Blossom Pink. Flowers 3 inches in diameter with frilled edges. Plants of dwarf growth.....	.50
No. 14. DIENER'S PINK GLORY. The greatest novelty in Petunias, pure flame rose pink, without a trace of purple. Flowers 3 to 4 inches in diameter and slightly ruffled. Plants attain a height of 12 to 14 inches. A very compact grower and is continually covered with flowers.....	.50
No. 15. BLUE AND WHITE. Especially adapted for window boxes or hanging baskets50
No. 16. WHITE GIANT. Snow white with flowers of the largest size, 5 to 6 inches across. The seedlings of this variety come 95% true.....	.50
No. 17. PALE SULPHUR YELLOW. Flowers single and double with heavily frilled edges. Entirely new, it being the first clear yellow.....	.25
No. 19. GIANT PINK GLORY. (1925.) An improvement on Pink Glory. It is of the same coloring as our No. 14, but the blooms are twice the size, and the plants of more bushy growth. This is a truly wonderful variety and should be in every garden50
No. 21. DEEP VIOLET. Flower of velvety texture with silver seam around the edge of the entire flower. Sturdy and compact growth.....	.50

	Price Per Pkg.
No. 22. ROSE COLOR. Very showy and striking, wonderful for massing in beds or borders. Very free blooming, plants of dwarf growth, reaching a height of 6 to 7 inches. Flowers two inches in diameter.....	.25
No. 23. PALE AMARANTH PINK. Flowers single, averaging two inches across, of dwarf growth. This variety is used extensively for bedding, as it blooms profusely25

Double Varieties

No. 24. GIANT DOUBLE MIXED—BROAD PETALS. Colors ranging from snow white through all shades of pink, mauve, purple and dark red, the lighter shades predominating. The double flowers are very large and perfectly formed, some being beautifully fringed, while others are ruffled and fluted. The seed of this variety is greatly improved over that which we offered last season. We guarantee 33% double. A peculiarity of the doubles is that they are the slowest growers in the lot. In most cases, the seedlings appearing first are the singles, while the latest are the doubles.....	\$1.00
No. 25. DOUBLE FRINGED MIXED. Double flowers and of all colors imaginable. Plants sturdy and erect, yielding a profusion of brilliantly marked flowers, some fringed and fluted, while others have lace-like edges.....	.50
NOTE: The next five varieties are the largest and most highly developed strains in double petunias. Nos. 27 and 28 are of the most wonderful colorings ever produced. The size of the flowers is around 6 inches in diameter, and all are guaranteed to bring 33% double.	
No. 26. RHODAMINE PURPLE. (1925.) Giant double, broad petals. Flowers 5 to 6 inches in diameter. Mammoth blossoms of the very richest coloring..	1.00
No. 27. AMARANTH PINK. (1925.) Giant double, a huge blossom with broad petals. A very free blooming variety of wonderful merits.....	1.00
No. 28. MAUVE. (1925.) Giant double, broad petals, flowers 5 to 6 inches in diameter. Blossoms extremely large and showy, of orchid coloring. Plants continually covered with blooms.....	1.00
No. 29. VIOLET PURPLE. (1925.) Giant double, broad petals. Flowers 5 to 6 inches across. One of our latest introductions that is sure to please the most critical	1.00
No. 31. PALE ROSOLANE PURPLE. (1925.) Double, heavily frilled. Dwarf and bushy growth, flowering continually. Average bloom, 3 inches across50
No. 32. DOUBLE PINK GLORY. (1926 Novelty.) Flowers very large and double, of pure flame rose pink. Of sturdy and compact growth. Pkg.....	1.00
No. 33. YELLOW DOUBLE. (1925.) Very clear yellow, very fine variety.....	.50

AMARYLLIS

Diener's Ever-Flowering Mammoth Hybrids

For years Mr. Diener has been working on Amaryllis to enlarge the flowers and enrich the coloring, and we now have a good stock on hand, the colors ranging from nearly white to all shades of rose, from red to deepest scarlet. The flowers are from ten to fourteen inches in diameter and are mostly four flowers to the stem. Unlike the old Amaryllis which flower only once a year, these new hybrids bring a spike every three or four months. They are very valuable as cut flowers. If the pollen is removed when the flowers open, they will last for several weeks.

Diener's mammoth Amaryllis Hybrids are destined to be a wonderful show flower in the near future. Cultivation is simple, as they grow easily. Soil suitable for a geranium or fuchsia is right for these Amaryllis. They must have very little shade when under glass, and during the summer kept out in the full sun in the open. When bulbs are larger, it is necessary in planting that just the roots be placed in the ground, the whole bulb must be above the ground. They should be watered only when the top soil is dry.

These Amaryllis should be kept under continual cultivation all the year around, never rested or kept dry. They should be kept in a temperature that will fall little below seventy degrees. Soil should be changed from time to time as required.

Prices are for bulbs to be sent by American Express, charges collect.

Young stock ready for first bloom, \$1.25 each; \$10.00 per dozen.

Older stock of better quality, \$2.00 each; \$20.00 per dozen.

Other bulbs at \$3.00, \$5.00, \$7.00, \$10.00 and \$15.00 each, priced by size and excellence of flower.

Amaryllis Seed

Amaryllis Seed should be sown in boxes or seed pans (in greenhouse or hotbed), containing finely sifted sandy leaf mold to a thickness of three inches. Smoothen out surface of soil evenly and sprinkle thoroughly. Spread seeds closely together (so close that they touch one another), and cover with the same soil just sufficient to hold them down. Keep moist but not too wet. If air is too dry, cover with glass. In case of very hot sun, cover the glass with a sheet of paper in order to prevent the heat from burning the young plants.

Plants will come up in about three weeks, and should remain in the same box for two or three months. Replant in three inch pots, or in boxes about two inches apart. Seedlings, when given the proper care, will commence to flower eighteen months after sowing. Seed may be sown at any time of the year in a greenhouse.

Prices are for seeds, postage prepaid.

Twenty seeds 50c; One Hundred seeds \$1.00; One Thousand seeds \$6.00.

* * * * *

Richard Diener Co.,
Kentfield, California.
Dear Sirs:

May 12th, 1925.

I got an Amaryllis bulb from you last year, gave \$5.00 for it. It came into bloom and now it is grand, and so out of the ordinary. We have a store and I have it in the window for people to see it. It is so beautiful. I should like another one. What variety and color can you suggest?

Yours truly,

(Signed) MRS. JACK WILSON,

Dundas, Ont., Canada.

* * * * *

DAHLIAS

Our Dahlias are the result of years of thought and labor in crossing, of the very finest varieties in existence. We have succeeded in producing flowers with exceedingly long wiry stems, unusually large flowers and exquisite coloring. The plants are extremely sturdy. They come from the cream of fifty thousand seedlings. We believe our creations among Dahlias will take the same rank among their kind that our Gladiolus have already achieved in their field.

Culture

No particular type of soil is required, though a medium loam deeply spaded and well mixed with a good commercial fertilizer will give the best results. When plants are about two feet high use manure as a mulch. Planting should be done after all danger of frost is over. The tubers should be planted in a horizontal position, about four inches deep and with the eye or sprout up. If large flowers are desired for cutting or exhibition, buds must be removed from all but a very few on the main stalks.

Roots are taken up in the fall after the frost has killed the foliage. The clumps should be allowed to dry three or four days and then stored in a cool, dry, dark place that is free from frost.

There being so many thousands of named varieties now on the market, we have preferred to list ours under our own name and number, except for the new type *Chrysanthemum Dahlia*.

The prices named below are for tubers sent postpaid.

DIENER No. 2.

Flame grenadine red with the extreme outer petals tipped with gold. Petals fold back regularly, showing a neatly folded center of red. This bloom resembles a large flaming ball, and is extremely striking and attractive. Stems long and rigid. A distinctly beautiful variety admired by all visitors.....

2.00 20.00

DIENER No. 6.

Splendid variety of champagne color shading into yellow at the center. An enormous bloom, each petal large and folded back, producing a large round mass of color. Long, rigid stems

3.00 30.00

DIENER No. 7.

Snow white with a faint touch of lemon in the center which grows lighter as the flower opens. Petals broad without markings. A very fine strain

2.50 25.00

DIENER No. 8.

One of the most beautiful Decoratives yet produced, of pure chalcidony yellow. A most delicate color. Very long petals, some having pointed tips and folded together, while others are divided and deeply cut out. A perfect specimen. Flowers are borne high above the foliage on long rigid stems. Perhaps the largest in existence.....

3.00 30.00

DIENER No. 10.

A striking combination of coral and buff. The larger part of the flower is an intense coral and very iridescent, while the two outer rows of petals are tipped with straw. Petals are long and folded back, forming a large flat flower. Good foliage and healthy grower. Stems very long and tough

3.00 30.00

DIENER No. 11.

A large blossom of Dahlia purple with maroon shading. A well rounded bloom with petals symmetrically arranged. Deeply colored center.....

3.00 30.00

DIENER No. 12

A many-petaled Peony of pure Magenta with no markings. Petals are notched and cut out so that each one has three points, giving a wonderful fringed effect. A unique creation which should be in every collection

2.50 25.00

DIENER No. 13.

A pleasing blossom of rose pink with straw colored shading. Outer edges show traces of lilac. A large flat bloom, having long, strong stems. Good cut flower variety. One of the best ever produced.....

2.50 25.00

RICHARD DIENER CO., INC., KENTFIELD, MARIN COUNTY, CALIFORNIA

DIENER No. 15.

Champagne tinted with pinkish lilac. An unusually soft and well blended color. Petals broad and evenly arranged. A good full decorative. Stems long and rigid

3.00 30.00

DIENER No. 17.

This attractive decorative of bordeaux, tipped with dahlia purple, is very iridescent. Large broad open petals. Long stems.....

2.50 25.00

DIENER No. 18.

A very beautiful dahlia of the decorative type, rosy pink underground, overlaid and striped with Amaranth pink. Very free blooming. Sturdy stems

3.00 30.00

DIENER No. 19.

An exquisite combination of sulphur yellow and shell pink. A decorative of great merit. Petals broad with slightly rounded tips, each being outlined with faint pink. Each petal appears to stand out individually. Flowers very hardy. One of our best.....

5.00 50.00

DIENER No. 24.

A very fine semi-double variety. Amaranth pink overlaid with Tyrian pink. Good broad petals. Very free blooming. Good foliage and stems....

2.00 20.00

DIENER No. 25.

Another of the semi-double variety. Real mallow purple with wide open petals. Large blossoms, free blooming. Good foliage and stems.....

1.50 15.00

DIENER No. 28.

Citron yellow heavily overlaid with pale rose purple. Very large decorative. Petals extremely wide and long

3.00 30.00

DIENER No. 29.

An immense decorative of extremely heavy texture. Deep roset red. Outer rows of petals tipped with old gold. Very iridescent. Long, wiry stems

3.00 30.00

DIENER No. 31.

Enormous decorative of Barina yellow overlaid with pinkish cinnamon and iridescent old rose. Very long wide petals. Stems extra long and wiry

5.00 50.00

DIENER No. 33. (1925)

Immense double of bordeaux, petals growing darker near the center, shading into deep burgundy. Velvet appearance. Petals have from two to three divisions. Good strong stems.....

5.00 50.00

DIENER No. 34.

A striking large double. Very iridescent rhodamine purple. Center rose purple. Each petal is unusually large and wide open. Long wiry stems

3.00 30.00

DIENER No. 35. (1925)

Grand Double. Brazil red. Outer row of petals greenish. Center petals double edged with Amaranth purple. Very iridescent. Long odd curling petals. Good stems

3.00 30.00

DIENER No. 38. (1925)

A very double Camellia shaped dahlia of snow white. Large broad petals and fine long stems. Lovely variety. Good sturdy growth.....

3.00 30.00

DIENER No. 39. (1925)

A large semi-cactus of coral red. Iridescent. Large curling broad petals. Long stems with good foliage. A beauty.....

3.00 30.00

"APRICOT"

Large semi double. Jasper pink overlaid with chrome around the center. Shell pink underground. Very iridescent. The colors blended together give an apricot shading. Gorgeous flower. Stems long and strong. Petals are large, wide and open, curling artistically.....

1.00 10.00

DIENER'S DELPHINIUM HYBRIDS

Dreams of Beauty

(Perennial)

They are the most resistant to mildew, the largest flowering and the finest varieties that have been offered for sale. They form exceptionally long spikes, and range in colors from very pale to deep blue, mauve and pink inlaid; a single flower measuring from two to three inches across.

Plants are sent by Express Charges Collect.

Small plants \$1.25 per dozen; \$10.00 per hundred.

Plants out of three inch pots \$2.00 per dozen; \$12.50 per hundred.

Seeds per trial packet 50c; per packet \$1.00; ¼ Oz. \$3.00; ½ Oz. \$5.00; 1 Oz. \$10.00.

Directions for Sowing Delphinium Seed

Seeds should be sown in boxes in a firm soil of equal parts of sand and leaf mold. Cover with soil to their thickness and pack with a smooth board being careful to preserve the porousness of the soil so that it will absorb water. Sift powdered Spaghnum Moss, peat or powdered leaf mold lightly over the top to insure surface moisture. The boxes should be placed in the shade where they must be kept at a moderately low, even temperature for two or three weeks as the seed germinates very slowly.

Transplant as soon as leaves are well formed placing plants about an inch apart. In selecting seedlings remember the fast growers usually germinate first but do not produce the best flowers.

Tritoma — Diener's Hybrids

Red Hot Pokers (Perennials)

This novelty was introduced last year and has already become very popular. An illustration in color is to be found on the inside cover. The flowers range in color from yellow and coral to orange and scarlet. The stems range from four to six feet in length, and the flower heads from eight to sixteen inches.

Directions for Sowing

Plants are raised from seed very easily. A rich sandy compost is recommended. Seeds should be sown thickly and covered to their own thickness with soil. When the plants have developed two or three leaves, they should be transplanted two or three inches apart, either in boxes or in the open. If large plants are set out have the roots near the surface. Do not plant too deep. In localities where the ground freezes, the plants should be well covered with leaves or taken out and heeled in, in a place free from frost.

Seeds are shipped free, plants by Express, charges collect.

Seed per package, 25c; per oz. \$5.00; per lb. \$65.00.

Divided plants, per dozen \$1.00; per 100 \$10.00; per 1000 \$80.00.

Pelargonium "Lady Washington"

"Diener's Giant"

An "Easter Greeting" variety, giant flowering. A single flower petal cannot be covered by a silver dollar. Color is a most beautiful rose, the two upper petals marked with large spots of burnt lake. The growth is compact like "Easter Greeting" and flowers continually. Plants have the appearance of an Azalea. For Spring Delivery out of three inch pots shipped American Express, Charges Collect, 50c each, \$5.00 per dozen.

Roses

We offer this year three new roses all perfected by Mr. Diener and placed on sale for the first time. We believe they have unusual merit and that they will find a well deserved place among the famous varieties of the world.

"ELLA McCLATCHY." This rose is continually in bloom. The flowers are single and about one and one-half inches in diameter. They form large clusters much like hydrangeas though not quite as compact. Rose color with rose pink center and edges of petals, tyrian rose. Cut flowers will retain their petals for a week or more if kept in fresh water. Plants are thornless and disease resisting.

Own Root plants, one year old \$2.00 each; \$20.00 per dozen.

"CAROLINE ESBERG." A beautiful new climbing flower. The color is ashes of roses very similar to our Rose Ash gladiolus and is new to roses. The flowers are double and form in clusters, blooming once in the Spring.

Own Root plants, one year old \$2.00 each; \$20.00 per dozen.

"DIENER'S BLUE." A new naphthalene violet climbing rose. Flowers are very double and about two inches in diameter. They form in large heavy clusters. The plants are almost thornless and are of vigorous heavy growth. They should not be planted against a wall but along an open fence or pergola to insure free circulation of air. We consider it the best blue rose yet produced.

Own Root plants, one year old \$2.00; \$20.00 per dozen.

"KENTFIELD." This was placed on the market first in 1923 and is one of the most beautiful roses grown. It is the result of a crossing with Cecile Brunner. The color is deep rose pink, the outer edges of the petals rose pink. This variety is very double and flowers are about one and one-half inches in diameter, forming in large clusters. Plants grow three feet high and are very vigorous, healthy and continually in bloom.

Rooted plants, one year old \$1.00 each; \$10.00 per dozen.

IRISES

No Garden is Complete Without Them

The Iris is very easy to grow and no flower is more satisfactory for home decoration. If cut and placed in water when the buds are well developed, they will open to their full bloom without loss of beauty. Every bud will open, thus giving a bouquet of rare richness and color for many days.

We offer the following varieties separately or in collections. If ordered separately in lots of not less than one dozen, the charge will be at the rate of a dozen for ten times the price of one. Prices include packing. Shipment is made by American Express, charges collect.

COLLECTION No. 1

Regular Price \$2.55. Collection Price \$2.00
Includes one each of the following:

LOHENGRIN; pink mauve.....	\$.35

DIENER SEEDS

Dahlia Flowered Zinnias

These Zinnias are a distinctly new type and a marked improvement over the old varieties. The petals are cupped and closely resemble the dahlia flower. The blooms are very large some seven and eight inches in diameter. The plants are strong stemmed and vigorous. Seed raised on our own farm. Colors are orange, golden yellow, white, salmon, pink, crimson, scarlet and purple. Per packet 50c; per $\frac{1}{4}$ Oz. \$1.00; per Oz. \$3.50; Plants 60c per doz., \$5.00 per 100.

Calendula

(African Marigold)

These are a great improvement over the common Marigold. In beds or groups they are very effective as they bloom from early Spring to late Fall. We offer the Orange King, very deep orange, and the Lemon Queen, a rich clear yellow. Selected colors 25c per packet; six packets \$1.00; Plants 60c per doz., \$5.00 per 100.

Shasta Daisy Flowered Single Aster

The Shasta Daisy flowered single Aster is of branching habit which may be described as a giant Single Ostrich Plume Aster, and it is exceedingly popular. The flowers have long, perfectly formed petals, but the golden yellow centers are very small. They are carried on long stiff stems from twelve to twenty inches in length. White, pink, scarlet, mauve, purple and other beautiful colors are in the mixture. It is of great value as a border plant, attaining a height of two to two and a half feet and is probably the best aster for cutting and house decoration. Per packet 25c; per $\frac{1}{4}$ oz. \$1.00; per oz. \$3.50; Plants 60c per doz., \$5.00 per 100.

Primula Malacoides, Diener's Hybrids

They are the results of three successive crosses between Primula Malacoides and Primula Obconica. The flowers are two or three times larger than Primula Malacoides and the colors are much deeper. They range from a deep lavender to almost red. The plants grow stronger and do not rot off so easily. A great improvement on Primula Malacoides. These flowers are favorites for pot plants and winter cut flowers. Per packet 25c; per dozen packets \$2.50.

Pansy Seed "Giant Excelsior"

A most beautiful pansy mixture, containing every color of the rainbow. The single flowers are of the very largest size. They are ruffled and fluted, and for bedding purposes are unexcelled. The best seed that money can buy. Per packet 50c; $\frac{1}{8}$ Oz. \$1.50; 1 Oz. \$10.00.

Directions for Sowing Pansy Seed

A rich sandy compost of old hotbed soil is recommended. Sow the seed thickly, cover to their own thickness with the same kind of soil and keep moist. As soon as the plants have developed two or three leaves, transplant into boxes or in the garden placing the plants about two inches apart.

Statice Sinuata

(Everlasting)—"Deep Blue"

It is a perennial which grows about 20 inches high and flowers continuously. *The flowers when cut will last for several years. This variety as developed by us, should be given a trial. Per packet 25c; per pound \$3.50.

Statice Sinuata

(Everlasting)—Mixed Hybrids

In colors of white, yellow, lavender, pink and lilac. The colorings in this mixture are very delicate. Per packet 25c; per pound \$3.50.

Directions for Sowing Statice Seeds

Statice seed should be sown in a sandy leaf mold soil. Even off the ground well, then sprinkle the seed over the surface, (seed should not be broken apart), and press it in with a flat board. Do not cover. Water thoroughly and cover with a sack or burlap which should be kept moist continually by sprinkling three or four times a day. As soon as the young plants appear, which will be in seven or eight days, the sacks should be removed. To prevent the snails from attacking the young seedlings, sprinkle lightly with air-slaked lime.

The Aztec Bean

The Aztec is one of the largest beans known. It grows in bush form, just like the Lima Bean, and is a perennial in places where it is not too cold or frosty. It grows like any other bean, but stands a great deal of drought. The flavor is unexcelled, and it may be eaten either as a green bean, or dry like the Lima. It is very prolific and we recommend all to give it a trial. An early Spring frost will not harm this variety. Per packet 25c.

Cucumber Seed "Sensation"

This variety is very valuable for forcing under glass and hotbeds as well as for garden growing. The fruit reaches a length of ten or twelve inches and is a deep green color. One plant will bring from two hundred and fifty to three hundred cucumbers in a single season if none are permitted to ripen on the vines. In a greenhouse, with a temperature of seventy degrees, the fruit will be ready to market within a week after flowering. Per packet 25c; Twelve packets \$2.50.

Miscellaneous

Prices are for Stock shipped American Express, Charges Collect.

AFRICAN LILY (*Agapanthus*) Blue and White, 50c each; \$4.00 per dozen.

ALPINE ROCK CRESS (*Arabis Alpina*), 10c each.
